

JAY JHANGIANI

New York, NY | (914) 451-9113 | jj3791@nyu.edu | [GitHub](#) | [LinkedIn](#)

Product manager with 5+ years building deterministic automation and AI-powered data products across financial services, healthcare, and enterprise technology. Track record of shipping in ambiguous environments, translating complex technical capabilities into products users trust and adopt. Passionate about creating simple products that earn trust through clarity, consistency and customer delight.

EXPERIENCE

Techsoft Inc. (MDRhythm.com), Agent Product Manager, New York, NY **August 2025 - Present**

- Led development of AI-driven features for clinical scheduling workflows enabling automation that reduced manual intervention across operations.
- Owned end-to-end development of a real-time voice AI agent, integrating large language models with live speech-to-speech pipelines to automate patient identity verification and care coordination.
- Designed and built HIPAA-compliant agentic systems using LangGraph and GPT-4o, applying LLM orchestration patterns - state machines, conditional branching, tool use - to solve high-stakes, real-time decision flows.
- Conducted primary user surveys to identify nuanced operational needs into features to improve experience and efficiency.
- Owned QA and bug tracking processes, prioritizing critical issues and improving system reliability across patient-facing interactions.
- Defined and monitored product performance metrics with analysts, generating insights that directly informed feature prioritization and product improvements.

JXOS Tech Consulting, Co-Founder & CTO, Mumbai, India **July 2019 - Present**

- Co-founded a digital product studio at 19, leading 0-to-1 development of web platforms across film, education, and wellness; drove 40% business growth via referrals and repeat clients.
- Partnered with leading psychologists in Mumbai and Bengaluru during the pandemic to build digital platforms enabling timely access to mental health support.

LTIMindtree Technology Consulting, Senior Product Owner - Data Engineering, Mumbai, India **June 2021 - July 2023**

- Owned the roadmap for 15+ enterprise data products serving global finance teams, partnering directly with Chevron executives to define requirements across compliance, forecasting, and billing, and translating those into scalable analytics products.
- Partnered with Chevron finance teams across Texas and California on SOX compliance tools, and with accounting teams in Manila and Australia on an automated reconciliation tool consolidating data across multiple sources.
- Designed and shipped the Finance Enhancement Dashboard tracking estimated vs. actual effort across sprints, cutting billing discrepancies by 60% and giving LTI's finance leadership real-time visibility into a \$15M annual revenue stream.
- Improved invoice approval rates to 98% (a 50% jump) by automating the CAPP invoice approval workflow via Power Platform, reducing processing time by 70%.
- Automated SOX assessment data consolidation across multiple sources including internal and external sources providing near real-time enterprise-wide reporting and handling exception scenarios with divergent outcomes across systems.
- Modernised data infrastructure by migrating SSRS and .NET reports to Power BI and automating data pipelines via ADF jobs and Azure Blob Storage, reducing manual data upload time by 80% and improving analytical capability across business units.
- Delivered digital solutions under the O2T initiative, automating and enhancing applications that saved tens of thousands of USD annually and eliminated over 3,500 hours of manual effort.
- Awards: GoMx Summit Business Unit of the Year 2022 | GoMx Q3FY22 Epic Winner Best Team

SPECIAL PROJECTS AND INTERNSHIP

Catalyzing Innovation, NYU Graduate Research Assistant (Product Analyst), New York, NY **August 2025 - January 2026**

- Led discovery with clients to identify operational gaps and prototype AI/automation solutions, improving lead-to-pilot conversion by 35%.
- Created documentation and quick-start guides for LLM workflows, improving adoption and stakeholder understanding across teams.

Lenovo, Product Owner - Digital Transformation Summer Analyst, Morrisville, NC **May 2024 - July 2024**

- Designed and delivered an executive KPI data product (Power BI) for Digital Transformation leadership, surfacing \$300M+ portfolio health across finance, operations, and technology.
- Built a scalable data product using Power Apps and Power Automate enabling cross-department reporting across global time zones cutting approximately 100 hours per week of manual effort.
- Mentored two interns and collaborated in agile teams, accelerating feature delivery and promoting stakeholder alignment.

EDUCATION

New York University Stern School of Business & Courant Institute School of Mathematics

New York, NY
GPA: 3.83

Thadomal Shahani Engineering College
Bachelor of Engineering in Computer Engineering

Mumbai, India
CGPA: 8.84

SKILLS

- **Technical Tools:** Python, SQL, Pandas, NumPy, Power BI, Azure, BigQuery, Power Automate, N8N, Cloudflare
- **AI:** LLM Integration, Prompt Engineering, LangGraph, LangChain, Voice AI (Speech-to-Speech), RAG Pipelines, Agentic Workflow Design, GPT-4o, Real-Time AI Systems
- **Product:** Sprint Planning, Backlog Management, Product Launches, UX Optimization, QA & Bug Tracking, A/B Testing, Stakeholder Communication, Cross-functional Collaboration, JIRA, ServiceNow
